

POTENTIAL HAZARDOUS WASTE SITE  
IDENTIFICATION AND PRELIMINARY ASSESSMENT

REGION SITE NUMBER (to be assigned by HQ)

6

98160-1818

**NOTE:** This form is completed for each potential hazardous waste site to help set priorities for site inspection. The information submitted on this form is based on available records and may be updated on subsequent forms as a result of additional inquiries and on-site inspections.

**GENERAL INSTRUCTIONS:** Complete Sections I and III through X as completely as possible before Section II (Preliminary Assessment). File this form in the Regional Hazardous Waste Log File and submit a copy to: U.S. Environmental Protection Agency, Site Tracking System, Hazardous Waste Enforcement Task Force (EN-335), 401 M ST, SW; Washington, DC 20460.

TEXAS WATER COMMISSION PA/SI PROJECT  
PRELIMINARY ASSESSMENT COMMENTS  
RIVERSIDE/TERRA CORPORATION  
P.O. BOX 338  
HIGHWAY 720 WEST  
FRISCO, TEXAS 75034  
TELEPHONE: 214/377-2427

**Documentation of Activities**

A Preliminary Assessment was conducted under the PA/SI project by George J. Putnicki of Gutierrez, Smouse, Wilmut & Associates, Inc. concerning pesticide application procedures by Riverside/Terra Corporation, Frisco, Texas. Mr. Putnicki performed the assessment on December 17, 1985. The assessment consisted of interviews with Mr. Anthony Pry, Location Manager and a site inspection of the pesticide storage area.

**Waste Management Practices**

Riverside/Terra Corporation has been in business at this location for approximately 7 years. There were no previous owners at this location. Riverside/Terra Corporation has another facility in Waco, Texas.

The Riverside/Terra Corporation site is approximately 3 acres. There are two buildings on the site, an office/storage building and a warehouse/shop building. There are several metal liquid fertilizer storage tanks, two trucks equipped with application equipment and several anhydrous ammonia tank trailers on the site.

Riverside/Terra Corporation sells herbicides and insecticides and stores and sells grain, seed and fertilizer. Anthony Pry reported that the company does not apply any pesticides but does sell them and owns application equipment that is rented to the farmers who buy the pesticides. Anthony Pry does not have a Texas Department of Agriculture license for commercial ground applicator of herbicides and pesticides. The pesticides are stored in the office/storage building. (See attached sketch of site.) A list of the types of pesticides and the amounts sold last year are attached. The pesticides sold to the farmers are mixed at the farms and the farmers are responsible for the disposal of the used containers. A few containers left at the site are rinsed, punctured and hauled to the city landfill. The application equipment is washed or rinsed at the farms. The wash water or rinse water is not contained but drains on the farm land.

During the site inspection, no odors were detected and dead vegetation was not observed. Other than a railroad drainage ditch, there are no watercourses or wells near the site. No spills or health problems were reported. Excess pesticides are usually used at the farms. There was no evidence of partially filled containers at the storage area inspected and no evidence of on-site disposal of pesticide containers. The pesticide handling procedures used by Riverside/Terra Corporation have not changed since it began operation 7 years ago and pesticide sales have remained stable during the past two years.

#### Assessment and Conclusions

The land uses adjacent to the storage areas at the site are the Burlington Northern Railroad on the east and commercial or light industrial on the adjacent property.

Because no pesticide mixing is done on the site and based on observations made during the preliminary site inspection which showed no evidence of on-site waste disposal, no indication of significant spillage or other indications of environmental damage, a site inspection is not warranted.
